DANCE TO BE HELD IN THE MUELBACH

pavilion at the Fair Grounds is now floor is somewhat broken and rough- Church. ened due to the moving in and out of

ter studying the matter carefully and was groomsman. it is believed the change will please those who are expecting to particihome folks and those from out-lying

Those in charge of the dance as sure us that a lot of real music will be on tap and that the building will be cooled by electric fans in the event of a hot night, so that everyone will be able to enjoy himself thoroughly.

Those who are in the habit of attending the dances, which have been given from time to time and who expect to attend that of the Fourth, are requested to keep this change in mind and to tell their friends of it It is the present intention to start the dance soon after the conclusion of the fireworks display.

As to the other features of the Whiz Bang, everything has now been arranged to make it a gala affair and there will be something doing every minute of the time, from nine o'clock in the morning until eleven o'clock

Don't forget the bg idinner and the big supper to be served in the agriculture pavilion at fifty cents per

Don't forget the magnificent fireworks display at night, as it will be one long to be rememberd.

Don't forget the twenty-five grand prizes which will be given away at 6 o'clock. If you haven't already purchased your ticket, you had better do so now, as only a limited number have been printed and after they are sold no more will be available

Don't forget the big races and other ahletic events. You will have a chance, not only to enjoy watching the ohers perform, but you will also FALL NOT TO BE TRIED have a chance to win some very attracive prizes if you should decide to participate in one or more of the events yourself.

Don't forget, that the whole Whiz Bang is your Whiz Bang, and that its success depends largely upon you. If it goes over big, Sikeston will secure a world of fine publicity and you will be proud to have had a part in the program. There will be hundreds of out-of-town visitors to whom the citizens, of Sikeston are hosts. We should one and all see to it that we not only greet them with the glad hand, but that we decorate our homes and places of business with flags and bunting in honor of their coming.

MEANS COVINCTED OF DRY LAW CONSPIRACY

New York, July 1 .- Gaston B. Means, former Department of Justice before some time during the winter. preciated. agent, and his secretary, Elmer W. Jarnecke, tonight were convicted of withdraw whisky from distilleries illegally. The jury was out one hour

From the investigation of the pre liminary movements, the bandits probably came into this section on either Wednesday or Thursday of last week. They are beleved to have stayed in the vicinity of Vanduser for parts of the two days preceding the robbery and to have been in Cape Girardeau late in the afternoon take part in this work, so you cannot of the day preceding the holdup, afford to miss this meeting. Bring probably investigating the roadsand the route that would be followed af-

> Three of the men are known to have actually gone to Vanduser, two of whom went into the bank and the MARKET REPORT third remained in the car, keeping the motor going. A fourth is now believed by the officers to have been implicated, he having the Ford car located at Painton, where the bandits

abandoned the large vehicle. From that point on their movements are practically unknown. One report was they headed toward Randles and Cape Girardeau, another that they went on into Scott county, but there is apparently little reliability in any.

Sheriff Roscoe Walker of Bloomfield believed today that an error in a telephone message to him relating the route the robbers had taken resulted in the bandit gang escaping. He was told, he said, that the bandits were heading south from Vanduser and accordingly he guarded the roads in that territory, but in reality they had gone north. If the Stoddard county sheriff had known this he could have headed off the robbers at Painton, he believes .- Cape Missourian.

Democrats in this section of the generally believed his ability as a campaigner will be an important factor in the general election campaign when this brilliant young Democrat will be able to meet his Republican opponent on every stump in the State.

Dr. Nelson's neighbors have a high regard for him personally, but declare in the language of the late Silver Dick" Bland, who represented this section so long in Congress, that "the cause must be put above the man". Older Missourians will remember that memorable statement of the famous Missourian when he was urged for the Democratic nomination

for Vice-President in 1896. Jacobs' swing through North Missouri last week showed sentiment strong for him in such counties as play with a tempest that would drive Marion, Ralls, Monroe, Randolph, Ma com, Ray, Shelby Schuyler, Adair, Chariton and other Democratic strongholds. This added to the plurality of 15,000 he will receive in Jackson County, and his vote in the Southwest, Northwest and Southeast, assure him the nomination.

Republicans are endeavoring to aid in Jacobs' defeat, because of his outstanding ability as a speaker and

June registration of new cars to date show Buick leading the field-with the difference getting greater and greater each day. Look at these comparisons. Determine the REAL leader for yourself.

Buick's total regristration for June are: -

46 per eent more than the next car;

192 per cent more than the second; 219 per cent more than the third;

228 per cent greater than the fourth,

289 per cent greater than the fifth: 338 per cent more than the sixth;

357 per cent more than the seventh;

377 per cent greater then the eighth or ninth, and

425 per cent greater than the tenth.

Such are the figures—a striking tribute to Buick and Buick values.

Buick outsells every other car again this month by a wide margin, regardless of price or supposed popularity—a continuation of sales advantage it enjoys for the year of 1924 to date.

What's the reason? Drive a Buick just once-and find out for yourself. We will furnish the car. Let us do it today.

Democratic **Platform**

The following is the text of the Dem ocratic platform as adopted by the

We, the representatives of the Demo cratic party, in national convention assembled, pay our profound homage to the memory of Woodrow Wilson. Our hearts are filled with gratitude that American democracy should have produced this man, whose spirit and influence will live on through the ages; and that it was our privilege to have cooperated with him in the advancement of ideals of government which will serve as an example and inspiration for this and future generations. affirm our abiding faith in those ideals and pledge ourselves to take up the standard which he bore and to strive for the full triumph of the principles of democracy for which he dedicated his

DEMOCRATIC PRINCIPLES

The Democratic party believes in equal rights to all and special privilege to none. The Republican party holds that special privileges are essential to national prosperity. It believes that national prosperity must originate with the special interests and seep down through the channels of trade to the less favored industries, to the wage earners and small salaried employees It has accordingly enthroned privilege and nurtured selfishness. The Republican party is concerned chiefly with material things; the Democratic party is concerned chiefly with human rights. The masses, burdened by discriminating laws and unjust administration, are demanding relief. The favored special interests, represented by the Republican party, contented with their unjust privileges, are demanding that no change be made. The Democratic party stands for remedial legislation and progress. The Republican party stands

COMPARISON OF PARTIES

We urge the American people to compare the record of eight unsullied years of Democratic administration with that of the Republican administration. In the former there was no corruption. The party pledges were faithfully fulfilled, and a Democratic congress enacted an extraordinary number of constructive and remedial laws. The ecolife of the nation quickened Tariff taxes were reduced. A federal trade commission was created.

A federal farm loan system was established. Child labor legislation was enacted. A good roads bill was passed. Eight-hour laws were adopted. A secretary of labor was given a seat in the cabinet of the President. The Clayton amendment to the Sherman anti-trust act was passed, freeing American labor. By the Smith-Lever bill improvement of agricultural conditions was effected. A corrupt practice act was adopted.

A well considered warehouse act was passed. Federal employment bureaus were created, farm loan banks were organized, and the federal reserve system was established. Privilege was uprooted. A corrupt lobby was driven from the national capital. A higher sense of individual and national duty was aroused. America enjoyed an unecedented period of social and mate rial progress.

During the time which intervened between the inauguration of a Democratic administration on March 4, 1913, and our entrance into the World war, we placed upon the statute books of our country more effective, constructive and remedial legislation than the Re-

publican party had placed there in a generation. During the great struggle which followed we had a leadership that carried America to greater heights of honor and power and glory than she had ever known before in her entire history Transition from this period of exalted

Democratic leadership to the sordid record of the last three and a half years make the nation ashamed. marks the contrast between a high conception of public service and an avid purpose to distribute spoils.

G. O. P. "CORRUPTION"

Never before in our history has the government been so tainted by corruption and never has an administra-tion so utterly failed. The nation has been appalled by the revelations of political depravity which have characterized the conduct of public affairs. arraign the Republican party for attempting to limit inquiry into official delinquencies and to impede, if not to trustrate, the investigations to which in the beginning the Republican party leaders assented, but which later they

regarded with dismay.

These investigations sent the former secretary of the interior to Three Rivers in disgrace and dishonor. These investigations revealed the incapacity and indifference to public obligation of the secretary of the navy, pelling him, by force of public opinion,

to quit the cabinet. These investigations confirmed the general impression as to the unfitness of the attorney general by exposing an official situation and personal contacts which shocked the conscience of the

nation and compelled his dismissal from These investigations disclosed the appalling conditions of the veterans' bureau, with its fraud upon the government and its cruel neglect of

sick and disabled soldiers of the World

These investigations revealed the criminal and fraudulent nature of the off leases, which caused the congress, despite the indifference of the Executive, to direct recovery of the public domain and the prosecution of the oriminal.

Such are the exigencies of partisan politics that Republican leaders are teaching the strange doctrine that publie censure should be directed against these who expose crime rather than against criminals who have committed the offenses. If only three cabinet officors out of ten are disgraced the country is asked to marvel at how many are free from taint.

Long boastful that it was the only "fit to govern," the Republican party has proven its inability to govern even itself. It is at war with itself. As an agency of government it

has ceased to function. The nation cannot afford to intrust its welfare to a political organization that cannot master itself, or to an Executive whose policies have been rejected by his own party. To retain in power an administration of this character would inevitably result in four years more of continued disorder, internal dissension 2 d governmental in- the farmer to ship his produce to mar-

efficiency.

A vote for Coolidge is a vote for

ISSUES ARE SET FORTH

The dominant issues of the campaign are created by existing conditions:

"Dishonesty, discrimination, extravagance and inefficiency exist in govern-ment. The burdens of taxation have become unbearable. Distress and bankruptcy in agriculture, the basic industry of our country, is affecting the happiness and prosperity of the whole people. The cost of living is causing hardship and unrest. The slowing down of industry is adding to the general

The tariff, the destruction of our foreign markets and the high cost of transportation are taking the profit out of agriculture, mining and other raw material industries. Large standing armies and the cost of preparing for war still cast their burdens upon humanity. These conditions the existing Republican administration has proven itself unwilling or unable to redress.

The Democratic party pledges itself to the following program: We pledge the Democratic party to drive from public places all which make barter of our national power, its resources or the administration of its laws; to punish those guilty of these offenses.

To put none but the honest in public to practice economy in the expenditure of public money; to reverence and respect the rights of all under the Constitution.

To condemn and destroy government by the spy and the blackmailer, as by this Republican administration was both encouraged and practiced.

TARIFF AND TAXATION

The Fordney-McCumber tariff act is the most unjust, unscientific and dishonest tariff tax measure ever enacted in our history. It is class legislation, which defrauds all the people for the benefit of a few; it heavily increases the cost of living, penalizes agriculture, corrupts the government, fosters paternalism, and, in the long run, does not benefit the very interests for which it was intended.

We denounce the Republican tariff laws which are written in great part in aid of monopolies and thus prevent that reasonable exchange of commodities which would enable foreign countries to buy our surplus agricultural and manufactured products with resultant benefit to the tollers and producers of America. Trade interchange, on the basis of reciprocal advantages to the countries participating is a timehonored doctrine of democratic faith.

We declare our party's position to be in favor of a tax on commodities entering the customs house that will promote effective competition, protect against monopoly and at the same time produce a fair revenue to support the government.

The greatest contributing factor in the increase and unbalancing of prices is unscientific taxation. After having increased taxation and the cost of living by \$2,000.000,000, under the Fordney-Mc-Cumber tariff, all that the Republican party could suggest in the way of relief was a cut of \$300,000,000 in direct taxes; and that was to be given prin cipally to those with the largest in omes.

Although there was no evidence of ack of capital for investment to meet the present requirements of all legitimate industrial enterprises, and although the farmers and general con sumers were bearing the brunt of tariff favors already granted to special interests, the administration was unable to ise any plan except one to grant further aid to the few.

Fortunately this plan of the administration failed and under Democratic leadership, aided by progressive Republicans, a more equitable one was adopted, which reduces direct taxes by about \$450,000,000.

REFERS TO MELLON PLAN

The issue between the President and the Democratic party is not one of tax reduction or of the conservation of cap-It is an issue of relative burden of taxation and of the distribution of capital as affected by the taxation of ncome. The President still stands on the so-called Mellon plan, which his party has just refused to indorse or mention in its platform.

The income tax was intended as a tax upon wealth. It was not intended to take from the poor any part of the necessities of life. We hold that the fairest tax with which to raise revenue for the federal government is the income tax.

We favor a graduated tax upon incomes, so adjusted as to lay the burdens of government on the taxpayers in proportion to the benefits they enjoy and their ability to pay. We oppose the so-called nuisance taxes, sales taxes and all other forms of taxation that unfairly shift to the consumer the burdens of taxation.

We refer to the Democratic revenue measure passed by the last congress as distinguished from the Mellon tax plan as an illustration of the policy of the Democratic party.

We first made a flat reduction of 25 per cent upon the tax of al incomes payable this year and then we so changed the proposed Mellon plan as to eliminate taxes upon the poor, reducing them upon moderate incomes and, in a lesser degree, upon the incomes of multimillionaires. We hold that all taxes are unnecessarily high, and pledge ourselves to further reduc-

We denounce the Mellon plan as a device to relieve multimillionaires at the expense of other taxpayers, and we accept the issue of taxation tendered by President Coolidge.

AGRICULTURE

During the four years of Republican government the economic condition of the American farmer has changed from comfort to bankruptcy, with all its attendant miseries. The chief causes of this are:

(a) The Republican party policy of isolation in international affairs has prevented Europe from getting back to its normal balance, and, by leaving unsolved the economic problems abroad, has driven the European city population from industrial activities to the soil n large numbers in order to earn the mere necessaries of life. This has deprived the American farmer of his nor-

mal export trade. (b) The Republican policy of a prohibitive tariff, exemplified in the Fordney-McCumber law, which has forced the American farmer, with his export market debilitated, to buy manufactured goods at sustained high domestic levels, thereby making him the victim of

the profiteer. (c) The Republican policy of high transportation rates, both rail and water, which has made it impossible for ket at even a living profit.

To offset these policies and their disastrous results, and to restore the farmto economic equality with other industrialists, we pledge our-

(a) To adopt an international policy of such co-operation by direct official, Instead of indirect and evasive unofficial, means as will re-establish the farmers' export market by restoring the industrial balance in Europe and the normal flow of international trade with the settlement of Europe's economic problems.

selves:

(b) To readjust and lower rail and water rates, which will make our markets, both for the buyer and the seller national and international, instead of regional and local.

(d) To bring about the early completional of internal waterway systems for transportation and to develop our wa ter powers for cheaper fertilizer and use on our farms. (e) To stimulate by every proper

governmental activity the progress of the co-operative marketing movement and the establishment of an export marketing corporation on commission. in order that the exportable surplus may not establish the price of the whole crop.

(f) To secure for the farmer credits suitable for his needs.

(g) By the establishment of these policies and others naturally supplementary thereto, to reduce the margin between what the producer receives for his products and the consumer has to pay for his supplies, to the end that we secure an equality for agriculture.

RAILROADS

The sponsors for the Esch-Cummins transportation act of 1920, at the time if its presentation to congress, stated that it had for its purposes the reduction of the cost of transportation, the improvement of service, the bettering of labor conditions, the promotion of peaceful co-operation between employer and employee, and at the same time the assurance of a fair and just return to the railroads upon their investment.

We are in accord with these announced purposes, but contend that the act has failed to accomplish them. It has failed to reduce the cost of transportation. The promised improvement in service has not been realized. The labor provisions of the act have proven unsatisfactory in settling differences between employer and employees.

The so-called recapture clause has worked out to the advantage of the strong and has been of no benefit to the weak. The pronouncement in the act for the development of both rail and water transportation has proven futile. Water transportation on our inland waterways has not been encouraged, and limitation of our coastwise trade is threatened by the administration of the act. It has unnecessarily interfered with

the power of the states to regulate purely intrastate transportation. must, therefore, be so rewritten that the high purposes which the public welfare demands may be accomplished.
Railroad freight rates should be so readjusted as to give the bulky basic. low-priced raw commodities, such as agricultural products, coal and the lowest rates, placing the higher rates upon more valuable and less bulky manufactured products.

MUSCLE SHOALS

We reaffirm and pledge the fulfillment of the policy, with reference to Muscle Shoals, as declared and passed by the Democratic majority of the Sixty-fourth congress in the national defense act of 1916, "for the production of nitrates or other products need munitions of war and useful in the manufacture of fertilizers."

We hold that the production of cheaper and high-grade fertilizers is essential to agricultural prosperity. We demand prompt action by congress for the operation of the Muscle Shoals plants to maximum capacity in the production, distribution and sale of commercial fertilizers to the farmers of the country, and we oppose any legis lation that limits the production of fertilizers at Muscle Shoals by limiting the amount of power to be used in their 'manufactures.

CREDIT AND CURRENCY

We denounce the recent cruel and unust contraction of legitimate and necessary credit and currency, which was directly due to the so-called deflation policy of the Republican party as declared in its national platform of June, 1920, and in the speech of acceptance of its candidacy for

the Presidency. Within eighteen months after the election of 1920 this policy resulted in withdrawing bank loans and discounts by over five billions of dollars and in contracting our currency by over fifteen hundred mil-

lions of dollars. This contraction bankrupted hundreds of thousands of farmers and stock growers in America and resulted in widespread industrial depression and unemployment, We demand that the federal reserve system be so administered as to give stability to industry, commerce and finance, as was intended by the Democratic party, which gave the federal reserve system to the

CONSERVATION

We pledge recovery of the navy's oil reserves, and all other parts of the public domain which have been fraudulently or illegally leased or otherwise wrongfully transferred to the control of private interests; vigorous prosecution of all public officials, private citizens and corporations that participated in these transactions revision of the water-power act, the general leasing act, and all other legislation relating to the public domain that may be essential to its conservation and honest and efficient use on behalf of the people of the country.

We believe that the nation should retain title to its water power and we favor the expeditious creation and development of our water power. We favor strict public control and conservation of all the nation's natural resources, such as coal, iron, oil and timber, and their use in such manner as may be to the best interest of

our citizens. The conservation of migratory birds, the establishment of game preserves. and the protection and conservation of wild life is of importance to agricul-

turists as well as sportsmen. Our disappearing natural resources of timber calls for a national policy of re forestation.

IMPROVED HIGHWAYS

Improved roads are of vital importance not only to commerce and industry but eral and state agencies.

Mining is one of the basic industrice federal agencies, and the multiplication of this country. We produce more coal, of offices and office holders.

iron, copper and silver than any other country. The value of our mineral productions is second only to agricul-Mining has suffered like agriculture and from the same causes. the duty of our government to foster this industry and to remove the restric-

tions that destroy its prosperity. We pledge the Democratic party to regby governmental agencies the anthracite coal industry and all other cor-where public weifare has been subordiporations controlling the necessaries of life nated to private interests.

MERCHANT MARINE

condemns the The Democratic party vacillating policy of the Republican administration in its failure to develop an American flag shipping policy. There has been a marked decrease in the volume of American commerce carried in American vessels as compared to the record under a Democratic administration

We oppose as illogical and unsound all efforts to overcome by subsidy the handicap to American shipping and commerce imposed by Republican policies.

We condemn the practice of certain American railroads in favoring foreign ships, and pledge ourselves to correct such discriminations. We declare for an American-owned merchant marine, Americanbuilt and manned by American crews, which is essential for naval security in war, and is a protection to the American farmer and manufacturer against excessive ocean freight charges on products of farm and factory

own and operate such merchant ships as will insure the accomplishment of these purposes and to continue such operation so long as it may be necessary without obstructing the development and growth of a privately owned American flag ship-

We denounce the action of the Republican administration in its violations of the principles of civil service by its partisan removals and manipulation of the eligible lists in the Post Office department and other governmental departments; by its packing the civil service commission so that that commission became the servile instrument of the administration in its wish to deny to the ex-service men their preferential rights under the law and the evasion of the requirements of the law, with reference

to appointments in the department. fully to comply with the spirit as well as the regulation of civil service; to extend its provisions to internal revenue officers and to other employees of the government not in executive positions, and to secure to ex-service men preference in such appointments.

We declare in favor of adequate salaries to provide decent living conditions for postal employees.

POPULAR ELECTIONS

We pledge the Democratic party to a policy which will prevent members of either house who fail of re-election from participating in the subsequent sessions of congress. This can be accomplished by fixing the days for convening the congress immediately after the biennial national election: and to this end we favor granting the right to the people of the several states to vote on proposed constitutional amendments on this subject.

ACTIVITY OF WOMEN

We welcome the wo to their rightful place by the side of men in the control of the government whose burdens they have always shared.

The Democratic party congratulates them upon the essential part which they have taken in the progress of our country and the zeal with which they are using their political power to aid the enactment of beneficient laws and the exaction of fidelity in the public

We favor generous appropriations, honest management and sympathetic care and assistance in the hospitalization, rehabilitation and compensation of the veterans of all wars and their dependents. The humanizing of the veterans' bureau is imperatively re-

CAMPAIGN FUNDS

The nation now knows that the predatory interests have, by supplying Republican campaign funds, systematically purchased legislative favors and administrative immunity. The practice must stop; our nation must return to honesty

and decency in politics. Elections are public affairs conducted for the sole purpose of ascertaining the will of the sovereign voters. Therefore we demand that national elections shall hereafter be kept free from the poison of excessive private contributions. To this end we favor reasonable means of publicity, at public expense, so that candidates, properly before the people for federal offices, may present their claims at

a minimum of cost. Such publicity should precede the and the election. We favor the prohibition of individual contributions, direct and indirect, to the campaign funds of congressmen, senators or Presidential candidates, beyond a reasonable sum to be fixed in the law. for both individual contributions and total expenditures, with requirements for full publicity. We advocate a com-plete revision of the corrupt practice act to prevent Newberryism and the election evils disclosed by recent investigations.

NARCOTICS, DRY LAW

Recognizing in narcotic addiction. especially the spreading of heroin addiction among the youth, a grave peril to America and to the human race, we pledge ourselves vigorously to take against it all legitimate and proper measures for education, for control, and for the suppression at home and abroad.

movements of the bandits for a few The program as conducted by the days prior to the robbery, but in the did after the holdup, have met with

From the investigation of the pre liminary movements, the bandits 4-Turning mattress with patient probably came into this section on either Wednesday or Thursday of last week. They are beleved to have stayed in the vicinity of Vanduser for parts of the two days preceding the robbery and to have been in Cape Girardeau late in the afternoon of the day preceding the holdup. the route that would be followed af-

> Three of the men are known to have actually gone to Vanduser, two of whom went into the bank and the third remained in the car, keeping the motor going. A fourth is now believed by the officers to have been implicated, he having the Ford car located at Painton, where the bandits

abandoned the large vehicle. From that point on their movements are practically unknown. One report was they headed toward Randles and Cape Girardeau, another that they went on into Scott county, but there is apparently little reliability in any.

Sheriff Roscoe Walker of Bloomfield believed today that an error in a telephone message to him relating the route the robbers had taken resulted in the bandit gang escaping. He was told, he said, that the bandits were heading south from Vanduser they had gone north. If the Stoddard county sheriff had known this he could have headed off the robbers at Painton, he believes .- Cape Missourian.

Just As Predicted

June registration of new cars to date show Buick leading the field—with the difference getting greater and greater each day. Look at these comparisons. Determine the REAL leader for yourself.

Buick's total regristration for June are: -

46 per eent more than the next car;

192 per cent more than the second;

219 per cent more than the third; 228 per cent greater than the fourth,

289 per cent greater than the fifth:

338 per cent more than the sixth;

357 per cent more than the seventh; 377 per cent greater then the eighth or ninth, and 425 per cent greater than the tenth.

Such are the figures—a striking tribute to Buick and Buick values.

Buick outsells every other car again this month by a wide margin, regardless of price or supposed popularity—a continuation of sales advantage it enjoys for the year of 1924 to date.

What's the reason? Drive a Buick just once—and find out for yourself. We will furnish the car. Let us do it today.

Democratic **Platform**

The following is the text of the Democratic platform as adopted by the

We, the representatives of the Democratic party, in national convention assembled, pay our profound homage to the memory of Woodrow Wilson. hearts are filled with gratitude that distress American democracy should have produced this man whose spirit and influence will live on through the ages; and that it was our privilege to have cooperated with him in the advancement serve as an example and inspiration for this and future generations. affirm our abiding faith in those ideals and pledge ourselves to take up the standard which he bore and to strive for the full triumph of the principles

DEMOCRATIC PRINCIPLES

The Democratic party believes in equal rights to all and special privilege to none. The Republican party holds that special privileges are essential to na-tional prosperity. It believes that national prosperity must originate with the special interests and seep down through the channels of trade to the less favored industries, to the wage earners and small salaried employees. It has accordingly enthroned privilege and nurtured selfishness. The Republican party is concerned chiefly material things; the Democratic party is concerned chiefly with human rights. masses, burdened by discriminating laws and unjust administration, are demanding relief. The favored special interests, represented by the Republican party, contented with their unjust privileges, are demanding that no change be made. The Democratic party stands for remedial legislation and it was intended. progress. The Republican party stands

COMPARISON OF PARTIES

We urge the American people to compare the record of eight unsullied years of Democratic administration with that of the Republican administration. In former there was no corruption. The party pledges were faithfully fulfilled, and a Democratic congress enacted an extraordinary number of constructive and remedial laws. The economic life of the nation quickened. Tariff taxes were reduced. A federal trade commission was created.

A federal farm loan system was established. Child labor legislation was enacted. A good roads bill was passed. Eight-hour laws were adopted. A secretary of labor was given a seat in the cabinet of the President. The Clayton amendment to the Sherman anti-trust act was passed, freeing American labor, By the Smith-Lever bill improvement of agricultural conditions was effected. A corrupt practice act was adopted.

A well considered warehouse act was passed. Federal employment bureaus were created, farm loan banks were organized, and the federal reserve system was established. Privilege was uprooted. A corrupt lobby was driven sense of individual and national duty was aroused. America enjoyed an unprecedented period of social and material progress.

During the time which intervened between the inauguration of a Democratic administration on March 4, 1913, and our entrance into the World war, we placed upon the statute books of our country more effective, constructive and remedial legislation than the Republican party had placed there in a generation

During the great struggle which followed we had a leadership that carried America to greater heights of honor and power and glory than she had ever known before in her entire history

Transition from this period of exalted Democratic leadership to the sordid record of the last three and a half years make the nation ashamed. marks the contrast between a high conception of public service and an avid purpose to distribute spoils.

G. O. P. "CORRUPTION"

Never before in our history has the government been so tainted by corruption and never has an administration so utterly failed. The nation has been appalled by the revelations of potitical depravity which have characterized the conduct of public affairs. We arraign the Republican party for attempting to limit inquiry into official delinquencies and to impede, if not to frustrate, the investigations to which in the beginning the Republican party leaders assented, but which later they regarded with dismay.

These investigations sent the former secretary of the interior to Three Rivers in disgrace and dishonor. These investigations revealed the incapacity and indifference to public obligation of the secretary of the navy, compelling him, by force of public opinion.

These investigations confirmed the general impression as to the unfitness of the attorney general by exposing an official situation and personal contacts which shocked the conscience of the nation and compelled his dismissal from the cabinet.

These investigations disclosed the appalling conditions of the veterans' bureau, with its fraud upon the government and its cruel neglect of the sick and disabled soldiers of the World

These investigations revealed the criminal and fraudulent nature of the ofl leases, which caused the congress despite the indifference of the Executive, to direct recovery of the public domain and the prosecution of the

Such are the exigencies of partisan politics that Republican leaders are eaching the strange doctrine that pub-He censure should be directed against those who expose crime rather than against criminals who have committed the offenses. If only three cabinet officors out of ten are disgraced the coun-

try is asked to marvel at how many are free from taint. Long boastful that it was the only arty "fit to govern," the Republican party has proven its inability to govern even itself. It is at war with itself. As an agency of government it

has ceased to function. The nation cannot afford to intrust its welfare to a political organization that cannot master itself or to an Executive whose policies have been rejected by his own party. To retain in power an administration of this charyears more of continued disorder, internal dissension > 'd governmental in-

ISSUES ARE SET FORTH

The dominant issues of the campaign are created by existing conditions: "Dishonesty, discrimination, extravagance and inefficiency exist in govern-The burdens of taxation have become unbearable. Distress and bankruptcy in agriculture, the basic industry of our country, is affecting the happiness and prosperity of the whole people. The cost of living is causing hardship and unrest. The slowing down of industry is adding to the general

The tariff, the destruction of our foreign markets and the high cost of transportation are taking the profit out of agriculture, mining and other raw material industries. Large standing armies and the cost of preparing for war still cast their burdens upon humanity. These conditions the existing Republican administration has proven itself unwilling or unable to redress.

The Democratic party pledges itself to the following program: We pledge of democracy for which he dedicated his the Democratic party to drive from public places all which make barter of our national power, its resources or the administration of its laws; to punish those guilty of these offenses. To put none but the honest in public

; to practice economy in the expenditure of public money; to reverence and respect the rights of all under the Constitution. To condemn and destroy government by the spy and the blackmailer, as by this Republican administration was

TARIFF AND TAXATION

both encouraged and practiced.

The Fordney-McCumber tariff act is the most unjust, unscientific and dishonest tariff tax measure ever enacted in our history. It is class legislation, which defrauds all the people for the benefit of a few; it heavily increases the cost of living, penalizes agriculture, corrupts the government, fosters paternalism, and, in the long run, does not benefit the very interests for which

We denounce the Republican tariff laws which are written in great part in aid of monopolies and thus prevent that reasonable exchange of commodities which would enable foreign countries to buy our surplus agricultural and manufactured products with resultant benefit to the tollers and producers of America. Trade interchange, on the basis of reciprocal advantages to the countries participating is a timehonored doctrine of democratic faith.

We declare our party's position to be in favor of a tax on commodities entering the customs house that will promote effective competition, protect against monopoly and at the same time produce a fair revenue to support the government.

The greatest contributing factor in the increase and unbalancing of prices is unscientific taxation. After having increased taxation and the cost of living by \$2,000.000,000, under the Fordney-Mc umber tariff, all that the Republican party could suggest in the way of relief was a cut of \$300,000,000 in direct taxes; and that was to be given principally to those with the largest in

Although there was no evidence of lack of capital for investment to meet the present requirements of all legitimate industrial enterprises, and although the farmers and general con sumers were bearing the brunt of tariff favors already granted to special interests, the administration was unable to devise any plan except one to grant further aid to the few.

Fortunately this plan of the adminis tration failed and under Democratic leadership, aided by progressive Repubmore equitable one adopted, which reduces direct taxes by

REFERS TO MELLON PLAN

The issue between the President and the Democratic party is not one of tax reduction or of the conservation of capital. It is an issue of relative burden of taxation and of the distribution of capital as affected by the taxation of income. The President still stands on the so-called Mellon plan, which his party has just refused to indorse or

The income tax was intended as a tax upon wealth. It was not intended to take from the poor any part of the necessities of life. We hold that the fairest tax with which to raise revenue for the federal government is the income tax.

We favor a graduated tax upon in comes, so adjusted as to lay the burdens of government on the taxpavers in proportion to the benefits they enjoy and their ability to pay. We oppose the so-called nuisance taxes, taxes and all other forms of taxation that unfairly shift to the consumer the burdens of taxation.

We refer to the Democratic revenue measure passed by the last congress as distinguished from the Mellon plan as an illustration of the policy of the Democratic party.

We first made a flat reduction of 25 per cent upon the tax of al incomes payable this year and then we so changed the proposed Mellon plan as o eliminate taxes upon the poor, reducing them upon moderate incomes and, in a lesser degree, upon the incomes of multimillionaires. We hold! that all taxes are unnecessarily high, and pledge ourselves to further reduc

We denounce the Mellon plan as device to relieve multimillionaires at the expense of other taxpayers, and accept the issue of taxation tendered by President Coolidge.

AGRICULTURE

During the four years of Republican government the economic condition of the American farmer has changed from comfort to bankruptcy, with all its. attendant miseries. The chief causes of this are:

(a) The Republican party policy of isolation in international affairs has prevented Europe from getting back to its normal balance, and, by leaving unsolved the economic problems abroad, has driven the European city population from industrial activities to the soil in large numbers in order to earn the mere necessaries of life. This has deprived the American farmer of his normal export trade.

(b) The Republican policy of a prohibitive tariff, exemplified in the Ford ney-McCumber law, which has forced the American farmer, with his export market debilitated, to buy manufactured goods at sustained high domestic levels, thereby making him the victim of the profiteer.

(c) The Republican policy of high transportation rates, both rail and wa ter, which has made it impossible for the farmer to ship his produce to mar at awan a living profit.

To offset these policies and their disastrous results, and to restore the farmer again to economic equality with other industrialists, we pledge our-

(a) To adopt an international policy of such co-operation by direct official, instead of indirect and evasive unofficial, means as will re-establish the farmers' export market by restoring the normal flow of international trade with the settlement of Europe's eco-

(b) To readjust and lower rail and water rates, which will make our markets, both for the buyer and the seller national and international, instead of regional and local.

(d) To bring about the early completional of internal waterway systems for transportation and to develop our water powers for cheaper fertilizer and

(e) To stimulate by every proper governmental activity the progress of the co-operative marketing movement and the establishment of an export marketing corporation on commission. in order that the exportable surplus may not establish the price of the (f) To secure for the farmer credits

suitable for his needs. (g) By the establishment of these policies and others naturally supplementary thereto, to reduce the margin between what the producer receives for his products and the consumer has to pay for his supplies, to the end that we secure an equality for agriculture.

RAILROADS

The sponsors for the Esch-Cummin transportation act of 1920, at the time of its presentation to congress, stated it had for its purposes the reduction of the cost of transportation, the improvement of service, the bettering of labor conditions, the promotion of peaceful co-operation between employer and employee, and at the same time the assurance of a fair and just return to the railroads upon their investment.

We are in accord with these announced purposes, but contend that the act has failed to accomplish them has failed to reduce the cost of transportation. The promised improvement n service has not been realized. The labor provisions of the act have proven unsatisfactory in settling differences

between employer and employees. The so-called recapture clause has worked out to the advantage of the strong and has been of no benefit to the weak. The pronouncement in the act for the development of both rail and water transportation has proven Water transportation on our inland waterways has not been encouraged, and limitation of our coastwise trade is threatened by the administra-

tion of the act. It has unnecessarily interfered with the power of the states to regulate purely intrastate transportation. It must, therefore, be so rewritten that the high purposes which the public welfare demands may be accomplished.

Railroad freight rates should be so readjusted as to give the bulky basic. low-priced raw commodities, such as agricultural products, coal and ores, the lowest rates, placing the higher rates upon more valuable and less bulky manufactured products.

MUSCLE SHOALS

We reaffirm and pledge the fulfillment of the policy, with reference to Muscle Shoals, as declared and passed by the Democratic majority of the Sixty-fourth congress in the national defense act of 1916, "for the production of nitrates or other products needed for munitions of war and useful in the manufacture of fertilizers."

We hold that the production of cheaper and high-grade fertilizers is essential to agricultural prosperity. We demand prompt action by congress for the operation of the Muscle Shoals plants to maximum capacity in the production distribution and sale of commercial fertilizers to the farmers of the country, and we oppose any legislation that limits the production of fertilizers at Muscle Shoals by limiting the amount of power to be used in their

CREDIT AND CURRENCY

We denounce the recent cruel and unust contraction of legitimate and necessar credit and currency, which was directly due to the so-called deflation policy of the Republican party as declared in its national platform of June, 1920, and in the speech of acceptance of its candidacy for the Presidency.

Within eighteen months after the elec tion of 1920 this policy resulted in withdrawing bank loans and discounts by over five billions of dollars and in contracting our currency by over fifteen hundred mil-

lions of dollars. This contraction bankrupted hundreds of thousands of farmers and stock growers in America and resulted in widespread industrial depression and unemployment. We demand that the federal reserve system be so administered as to give stability to industry, commerce and finance, as was intended by the Democratic party, which gave the federal reserve system to the

CONSERVATION

We pledge recovery of the navy's oil reserves, and all other parts of the public domain which have been fraudulently or illegally leased or otherwise wrongfully transferred to the control of private interests; vigorous prosecution of all public officials, private citizens and corporations that participated in these transactions revision of the water-power act, the general leasing act, and all other legislation relating to the public domain that may be essential to its conservation and honest and efficient use on behalf of the people of the country.

We believe that the nation should retain title to its water power and we favor the expeditious creation and development of our water power. We favor strict public control and conservation of all the nation's natural resources, such as coal, iron, oil and timber, and their use in such manner as may be to the best interest of

The conservation of migratory birds,

he establishment of game preserves, and the protection and conservation of wild life is of importance to agriculturists as well as sportsmen. Our disappearing natural resources of timber calls for a national policy of re-

IMPROVED HIGHWAYS

forestation.

Improved roads are of vital importance not only to commerce and industry but cratic party in this matter and favor con- and duties of the states. tinuance of federal aid ur der existing federal and state agencies.

of this country. We produce more coal, of offices and office holders.

fron, copper and silver than any other The value of our mineral country. productions is second only to agriculture. Mining has suffered like agriculture and from the same causes. the duty of our government to foster this industry and to remove the restric

tions that destroy its prosperity. We pledge the Democratic party to regulate by governmental agencies the an-thracite coal industry and all other corwhere public welfare has been subordiporations controlling the necessaries of life nated to private interests.

MERCHANT MARINE

The Democratic party condemns the vacillating policy of the Republican administration in its failure to develop an American flag shipping policy. There has been a marked decrease in the volume of American commerce carried in American vessels as compared to the record under

a Democratic administration We oppose as illogical and unsound all efforts to overcome by subsidy the handicap to American shipping and commerce

imposed by Republican policies.

We condemn the practice of certain

American railroads in favoring foreign ships, and pledge ourselves to correct such discriminations. We declare for an American-owned merchant marine, Americanbuilt and manned by American crews, which is essential for paval security in war, and is a protection to the American farmer and manufacturer against excessive ocean freight charges on products of farm and factory

We declare that the government should own and operate such merchant ships as will insure the accomplishment of these purposes and to continue such operation so long as it may be necessary without obstructing the development and growth of a privately owned American flag shipping.

CIVIL SERVICE

We denounce the action of the Repub lican administration in its violations of the principles of civil service by its parisan removals and manipulation of the eligible lists in the Post Office department and other governmental departments; by its packing the civil service commission so that that commission be came the servile instrument of the administration in its wish to deny to the ex-service men their preferential rights under the law and the evasion of the requirements of the law, with reference to appointments in the department.

We pledge the Democratic party faithfully to comply with the spirit as well as the regulation of civil service; to extend its provisions to internal revenue officers and to other employees of the government not in executive positions, and to secure to ex-service men preference in such appointments.

We declare in favor of adequate salaries to provide decent living conditions for postal employees.

POPULAR ELECTIONS

policy which will prevent members of ei-ther house who fail of re-election from participating in the subsequent sessions of congress. This can be accomplished by fixing the days for convening the congress immediately after the biennial national election; and to this end we favor granting the right to the people of the several states to vote on proposed constitutional amendments on this subject.

ACTIVITY OF WOMEN

We welcome the women of the nation to their rightful place by the side of men in the control of the government whose burdens they have always shared.

The Democratic party congratulates them upon the essential part which they have taken in the progress of our country and the zeal with which they are using their political power to aid the enactment of beneficient laws and the exaction of fidelity in the public

We favor generous appropriations, honest management and sympathetic care and assistance in the hospitalization, rehabilitation and compensation of the veterans of all wars and their dependents. The humanizing of the veterans' bureau is imperatively re-

CAMPAIGN FUNDS

The nation now knows that the pred atory interests have, by supplying Republican campaign funds, systematically purchased legislative favors and adminstrative immunity. The practice must stop; our nation must return to honesty and decency in politics.

Elections are public affairs conducted for the sole purpose of ascertaining the will of the sovereign voters. Therefore we demand that national elections shall hereafter be kept free from the poison of excessive private contributions. To this end we favor reasonable means of pub licity, at public expense, so that candidates, properly before the people for federal offices, may present their claims at a minimum of cost.

Such publicity should precede the primary and the election. We favor the prohibition of individual contributions, direct and indirect, to the campaign funds of congressmen, senators or Presidential candidates, beyond reasonable sum to be fixed in the law. for both individual contributions and total expenditures, with requirements for full publicity. We advocate a complete revision of the corrupt practice act to prevent Newberryism and the election evils disclosed by recent investigations.

NARCOTICS, DRY LAW

Recognizing in narcotic addiction. especially the spreading of heroin addiction among the youth, a grave peril to Amer ica and to the human race, we pledge our selves vigorously to take against it all legitimate and proper measures for education, for control, and for the suppression at home and abroad. Te Republican administration has failed

to enforce the prohibition law; is guilty of trafficking in liquor permits, and has The Democratic party pledges itself to respect and enforce the Constitution and

STATE RIGHTS

We demand that the states of the union shall be preserved in all their vigor and power. They constitute a bulwark against the centralizing and destructive tendencies of the Republican party.

We oppose the extension of bureaucracy, al and state agencies.

Mining is one of the basic industries federal agencies, and the multiplication

We demand a revival of the spirit of local self-government, essential to the preservation of the free institutions of our republic

INSULAR POSSESSIONS

We piedge ourselves to maintain our established position in favor of the exclusion of Asiatic immigrants.

The Filipino peoples have succeeded in maintaining a stable government and have thus fulfilled the only condition laid down by congress as a prerequisite to the granting of independence. We declare that it is now our liberty and our duty to keep our promise to these people by granting them immediately the independence which they so honorably covet. The maladministration of affairs in Alaska is a matter of concern to all our

Under the Republican administration development has ceased and the fishing industry has been seriously impaired. We pledge ourselves to correct the evils which have grown up in the administration of that rich domain.

An adequate form of local self-gov-

ernment for Alaska must be provided. and to that end we favor the estab-lishment of a full territorial form of government for that territory similar to that enjoyed by all the territories except Alaska during the last century of American history. We believe in a policy for continuing the improvements of the national parks,

the harbors and breakwaters, and the federal roads of the territory of Hawaii We recommend legislation for welfare of the inhabitants of the Virgin islands.

WAR AND DEFENSE

War is a relic of barbarism and it is justifiable only as a measure of defense. In the event of war in which the man power of the nation is drafted, all other resources should likewise be drafted. This will tend to discourage war by depriving it of its profits.

We demand a strict and sweeping reduction of armaments by land and sea, so that there shall be no competitive military program or naval building. Until international agreements to this end have been made, we advocate an army and navy adequate for our national safety. Our government should secure a joint agreement with all nations for world disarmament and also for a referendum of war, except in case of actual or

bear the burdens imposed by war sho whenever possible, be consulted before this supreme sacrifice is required of them.

LAUSANNE TREATY

Those who must furnish the blood and

We condemn the Lausanne treaty. I barters legitimate American rights and betrays Armenia for the Chester off

We favor the protection of American rights in Turkey and the fulfillment of President Wilson's arbitral award respecting Armenia.

Republic of Greece-We welcome to the sisterhood of republics the ancient land of Greece, which gave to our party its priceless name. We extend to her government and people our cordial

LEAGUE OF NATIONS

The Democratic party pledges all its energies to the outlawing of the whole the wholesale slaughter of human being on the battlefield is any more necessary to man's highest development than is killing by individuals.

economic recovery lies in the organized efforts of sovereign nations co-operating to remove the causes of war and to substitute law and order for violence. Under Democratic leadership a prac tical plan was devised under which 54 nations are now operating and which has

The only hope for world peace and for

for its fundamental purpose the free co operation of all nations in the work of The government of the United States for the last four years has had no for eign policy; and consequently it has delayed the restoration of the political and conomic agencies of the world. It has

impaired our self-respect at home and in-

jured our prestige abroad. It has cur-

tailed our foreign markets and ruined our agricultural prices. It is of supreme importance to civilization and to mankind that America be placed and kept on the right side of the greatest moral question of all time, and herefore the Democratic party renews its declaration of confidence in the ideal of world peace, the League of Nations and the world court of justice as together constituting the supreme effort of the statesmanship and religious conviction of our time to organize the world for peace. Further, the Democratic party declared that it will be the purpose of the next administration to do all in its power to secure for our country that moral leadership in the family of nations which, in the

providence of God, has been so clearly marked out for it. There is no substitute for the League of Nations as an agency working for peace; therefore we believe that, in the interest of permanent peace, and in the lifting of the great burdens of war from the backs of the people, and in order to establish a permanent foreign policy on these supreme questions, not subject to change with changing of party administration, i is desirable, wise and necessary to lift this question out of the party politics and to that end to take the sense of the American people at a referendum election, ad visory to the government, to be held officially under act of congress, free from all other questions and candidacies after ample time for full consideration and discussion throughout the country, upon the

question, in substance, as follows: "Shall the United States become a men ber of the League of Nations upon such reservations or amendments to the covenant of the league as the President and the senate of the United States may agree upon?"

Immediately upon an affirmative vote we will carry out such mandate

DEEP WATERWAYS

We favor and will promote deep waterways from the Great Lakes to the Gulf and to the Atlantic ocean. We favor a policy for the fostering and

building of inland waterways and the re-moval of discrimination against water transportation. Flood control and the lowering of flood levels is essential to the safety of life and property, the productivity of our lands, the navigability of our streams and the reclaiming of our wet and overflowed lands and the creation o hydroelectric power. We favor the exalso to agriculture and national life. We condemn the efforts of the Repubcall attention to the record of the Demolican party to nationalize the functions works on the Mississippi and Colorado rivers and also such reclamation and irrigation projects upon the Colorado river as may be found to be feasible and practical.

We favor liberal appropriations for

prompt co-ordinated surveys by the United States to determine the possibilities of general navigation improvements and water power development on navigable streams and their tributaries, to secure reliable information as to the most economical navigation im provement, in combination with the most efficient and complete development

of water power. We favor suspension of the granting of federal water power licenses by the federal water power commission until congress has received reports from the water power commission with regard to applica-tions for such licenses.

POLICY ON EDUCATION

the intellectual and moral qualifications of its citizens and for the expenditure sovereign right in all matters pertainmade available through the federal of our schools in view of our national in the cans.

RECLAMATION

The Democratic party was foremost in urging immediate reclamation for the arid and semi-arid lands of the the duty of the government to utilize travagant inefficiencies and mistakes of the federal government.

The reclamation act of 1924, recommended by the fact-finding commission and added as an amendment to the secinated from that bill by the Republican to congress one hour before adjourn-

The Democratic party pledges itself actively, efficiently and economically to ty in the near future, carry on the reclamation projects, and to make equitable adjustment for the mistakes the government has made

FRAUD IN STOCKS

We favor the immediate passage of such legislation as may be necessary to enable the states efficiently to enforce their laws relating to the gradual financial strangling of innocent investors, workers and consumers, caused by the indiscriminate promotion, refinancing and reorganizing capitalized basis, resulting already in the undermining and collapse of many railroads, public service and industrial corporations, manifesting itself in unemploy ment, irreparable loss and waste, and which constitute a serious menace to the

PRIVATE MONOPOLY

The federal trade commission has submitted to the Republican administration numerous reports showing the existence of monopolies and combinations in re- bought canned goods. straint of trade, and has recommended proceedings against these violators of the war system. We refuse to believe that law. The few prosecutions which have resulted from this abundant evidence furnished by this agency created by the Democratic party, while proving the indifference of the administration to the violations of law by trusts and monopo lies and its friendship for them, nevertheless demonstrate the value of the federal

We declare that a private monopoly is indefensible and intolerable, and pledge the Democratic party to vigorous enforcement of existing laws against monopoly and illegal combinations, and to the en-actment of such further measures as may be necessary.

LABOR, CHILD WELFARE

Labor is not a commodity. It is human inder which labor is performed. We favor that the products of convict labor shipped from one state to another shall be subject to the laws of the latter state exactly as though they had been produced therein In order to mitigate unemployment attending business depression, we urge the enactment of legislation authorizing the construction and repair of public works be initiated in periods of acute unemploy-

ment. Without the votes of Democratic members of the congress the child laoor amendment would not have been submitted for ratification.

LATIN AMERICA

From the day of their birth friendly relations have existed between the Latin-American republics and the United States. The friendship grows stronger' as our relations become more intimate. The Democratic party sends to these republics its cordial greeting; God has made us neighbors-justice shall keep us friends.

THE KLAN PLANK

FREEDOM OF RELIGION. FREEDOM OF SPEECH. FREEDOM OF PRESS.

The Democratic party affirms its ad-

herence and devotion to those cardinal principles contained in the Constituion and the precepts upon which our government is founded, that congress shall make no laws respecting the establishment of religion, or prohibiting the free exercise thereof, or abridging the freedom of speech or of the press, or the right of the people peaceably to assemble and to petition the gevernment for a redress of grievances, that the church and state shall be and remain separate, and that no religious test shall ever be required as a qualification to any office of public and in Kashir.

trust under the United States. These principles we pledge ourselves ever to defend and maintain. We insist at all times upon obedience to the orderly processes of the law and deplore and condemn any effort to arouse religious or racial dissension. Affirming our faith in these principles we submit our cause to the people.

FARM BUREABU NEWS FROM NEW MADRID

Canning Demonstration Held Last Friday

Miss Mary E. Robinson, of the University Extension Service, held a canning demonstration, at the home of Mrs. T. A. Penman. The purpose of this demonstration was to show the best methods to use in putting up fruits, vegetables and meats. Two pressure cookers were in operation We believe with Thomas Jefferson and the food that was canned consistand founders of the republic that ig-norance is the enemy of freedom and that each state, being responsible for The ladies present were all extra gool cooks, but they were all delighted of the moneys collected by taxation for with the demonstration. Among those the support of its schools, shall use its present were Mrs. Lawrence Hahn ing to education. The federal govern- and Mrs. J. J. Klipfel. Mrs. Hann ment should offer to the states such has expressed her intention of securcounsel, advice and aid as may be ing a pressure cooker and she intends agencies for the general improvement to market some of her garden stuff

Garment Making School A Sucess The garment making school held at Lilbourn last week proved highly successful. Every lady attending this school made herself a dress, and West. Keep Your Garden

Just because the work is piling up do not allow the garden to become neglected. Remember that you can keep it filled all along and that the spring vegetables are not the only ones you can raise. Eat from your garden and not from cans. Vegetables that can be planted now are: Cabbage, collard and tomato plants of corporations on an inflated and over- for fall and winter use; snap beans, corn, bush lima beans, beets, Swiss chard, carrots, cucumbers, kale, okra, salsify, parsnips, radishes and pumpkins may also be planted. Lettuce plnats can be set in cold frames where some protection from the sun may be given. Sweet potatoes may be planted using vine cuttings, also late Irish potatoes can be planted. It will pay every farmer to keep up his garden and stay away from the

> New War Salvage Explosive Since Sodatol, the war salvage ex-

plosive, has been exhausted the Government has decided to manufacture, out of salvage material, another cheap and efficient explosive for agricultural uses. This explosive called Pyrotol and will be available to those who want it by September. Pyrotol is of the same strength as Sodatol, which is equal to 40 per cent dynamite and will be used for the same purposes which Sodatol is use l. Like Sodatol it is not adapted to ditching but is intended for blowing stumps and land clearing operations. We favor collective bargaining and laws There is no denite information on the regulating hours of labor and conditions price of the powder, but it is expectthe enactment of legislation providing ed to be approximately the same price as Sodatol. Those who are interested in securing a cheap and efficient explosive should determine how much they will need and be ready to let the County Agent know as quickly as this powder becomes
